

WZSU / WZSUS Rotary Stripper

The WZSU / WZSUS rotary strippers are used to strip the copper sheath to assist in the termination of the cable.

There are 2 sizes of rotary strippers available.

The large Stripper

WZSU will accommodate all sizes of Mineral cable by adjustment of the knurled screw and locknut. The small "V" of the reversible block will accommodate cables up to 8.5mm diameter for cables above this size, the larger "V" must be used.

The Small Rotary Stripper

WZSUS will accommodate Mineral cable up to 8mm diameter. This tool has a fixed V block and is adjusted by means of the knurled screw.

Replacement blades are also available

For WZSUS rotary stripper blades, WZSUB (sold in packs of five)

For WZSU rotary stripper blades, WZSUB (sold in packs of five)
