

WZBLA/WZBLB Bending Lever

Product Information

Wrexham Mineral insulated cables can normally be bent by hand, but MICC Bending Lever
 To assist in the symmetry of multiple bends on MICC cables to assist lay and dressing
 during installation.

Two sizes are available.

The WZBLA/WZBLB bending lever - For use with cables between 10mm and 16mm diameter - WZBLA
 The WZBLA/WZBLB bending lever - For use with cables between 16mm and 27mm diameter - WZBLB *

NOTES:

WMC cables can normally be bent by hand, but to assist in cable laying or the symmetry of multiple bends on both large and small installations. The bending lever can even be considered where the heaviest cables are involved, bending levers can save time, ensure cables meet the correct bend radius and dramatically improve the cosmetic look of installations.
